Experience

Freelance

Fullstack & Blockchain software developer   *January 2021 - present*

- Working for a client that focuses on blockchain technologies as a solo developer creating frontend, backend, API's and smart contracts within Ethereum and Solana networks.
- Worked with React, NextJS, TailwindCSS and Flutter as frontend frameworks; NodeJS, PHP and Python as backend technologies; Solidity and Rust for blockchain development.
- Working with Prime Delivery, creating a shift managing software and a new data fetching system for business statistics, making it more than 5 times faster compared to the old one. Additionally, made a recruiting website using ReactJS.

Gameroom s.r.o.

Internet cafe administrator   *June 2018 – November 2020*

- Integrated newer systems (such as JivoChat) with a new front page, which significantly increased the outreach of the cafe.
- I created the front page and an online store for computer parts using ReactJS and WooCommerce as an e-commerce framework.
